Sam –

Here is a copy of Congressman Green's original letter re: US Oil Recovery.

Attached are the 3 NRC reports associated with US Oil Recovery PRP Group for incidents at 200 Richey Street (Copies Attached).

The first from 8/29 – (1) reports that on 8/29 the former water treatment facility FLOODED at the 200 Richey Street Superfund site.

The second and third reports from the same day 9/9 – (2) report incident at 200 Richey on 9/6 for unknown amount of storm water (1100-1930 hrs) AND (3) report incident at 200 Richey on 9/7 for 200 gallons of storm water (0530-0645 hrs).

Also, so that you have it. Harris County Pollution Control provided EPA with photos of the flooding at US Oil Recovery (attached) and the PRP Group shared an aerial photo expert report regarding the NOAA photo reported by AP to show black oily material flowing from the site (attached).
